

MS Tahir Majeed 13 2 16

MS vs Guillain Barre

MS reflexes brisk upgoing plantars GBS reflexes lost

Bladder symptoms= spinal cord or brain

Eyes= brain stem [balance vision speech swallowing]

Sensory Tingling which remits then occurs somewhere else

New drugs only for relapsing remitting type

Anti spasmodics baclofen dantrolene and others

Not Cannabis some spasticity needed to support legs

No effect on pregnancy apart from side effects of drugs
