

Treatments for OAB

While LUTS-FORTA looked at drugs for all LUTS indications, the following table lists the FORTA rating for drugs commonly used to treat OAB.¹

FORTA rating	Drug
B = beneficial	Toviaz® (fesoterodine)
C = careful	Darifenacin Mirabegron Oxybutynin low dose/extended release Solifenacin Tolterodine Tropsium
D = don't	Oxybutynin standard dose/immediate release Propiverine

Adapted from Oelke M, et al.¹

**Toviaz® was the
only drug for
OAB to be given
a 'B = beneficial'
rating**
